

Free Alternative Fuel Vehicle Training Hosted by Tennessee Fire and Codes Academy

Tuesday February 13th – 8-hour Alternative Fuel Vehicle Training – 8am – 5pm in TFACA Conference Center IMT Room

NFPA's Alternative Fuel Vehicles (AFV) Safety Training is designed to help first & second responders across the U.S. prepare for the growing number of hybrid/electric, fuel cell, and gaseous fuel trucks, buses, commercial fleets, and passenger vehicles. With over 15 million of these vehicles on the road today, it is essential that responders have a solid understanding of safety concepts associated with this new technology.

Today the program offers a wide array of education materials including an instructor-led classroom course, self-paced online training utilizing highly-interactive learning modules which include videos, graphics, 3D animations, simulations, and data review exercises, educational video series, interactive 3D learning models, and quick reference materials.

This course is open for registration in Acadis. Lunch meal is covered by the sponsor. Dorm and other meal fees are the responsibility of the attendee or their agency.

Wednesday February 14th – 4-hour Train-the-Trainer Program 8am-12pm in TFACA Conference Center IMT Room

This course will be an overview and handoff of the 8-hour course held the day before. There will also be a Q&A session with the instructor. Attendees are welcome to, but do not need to attend both days. Instructors who wish to take this curriculum back to their agency can attend only this TtT if they wish.

This course is open for registration in Acadis. Dorm and other meal fees are the responsibility of the attendee or their agency.
